## 7.Delay

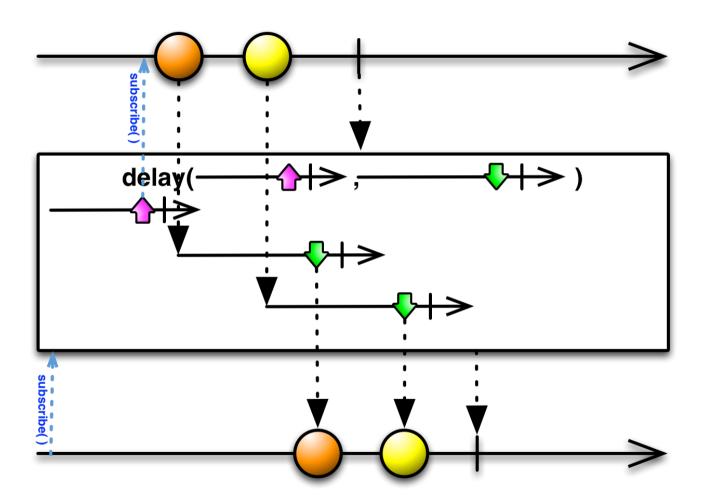

## Delay 示意图

延迟一段指定的时间再发射来自Observable的发射物

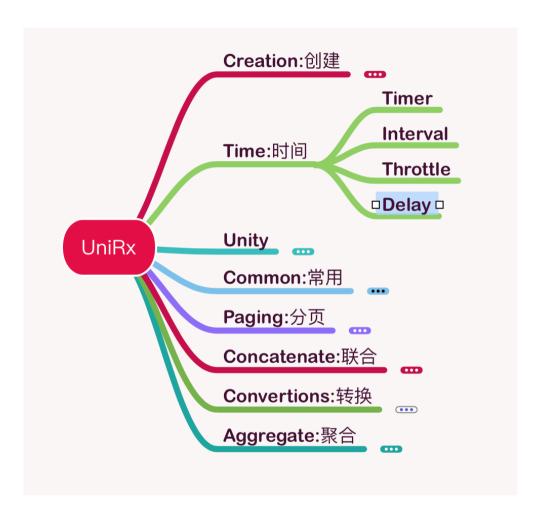

## Delay 在知识地图中的位置

## Delay 代码示例

```
* http://sikiedu.com liangxie
using System;
using UniRx;
using UnityEngine;
namespace UniRxLesson
    public class DelayExample : MonoBehaviour
         private void Start()
             Observable.EveryUpdate()
                  .Where(_ => Input.GetMouseButtonDown(0))
```

```
.Delay(TimeSpan.FromSeconds(1.0f))
.Subscribe(_ => { Debug.Log("mouse clicked"); })
.AddTo(this);
}
}
```

输出的结果为,点击鼠标 1 秒之后输出 mouse clicked,每次点击事件都是 1 秒之后才输出。 今天的内容就这些
