```
using System.Linq;
using UnityEngine;
namespace UniRxLesson
{
      public class LINQSkipExample : MonoBehaviour
            private void Start()
                  int[] grades = {59, 82, 70, 56, 92, 98, 85};
                  var lowerGrades =
                        grades.OrderByDescending(g => g).Skip(3);
                  foreach (var grade in lowerGrades)
                        Debug.Log(grade);
```

}

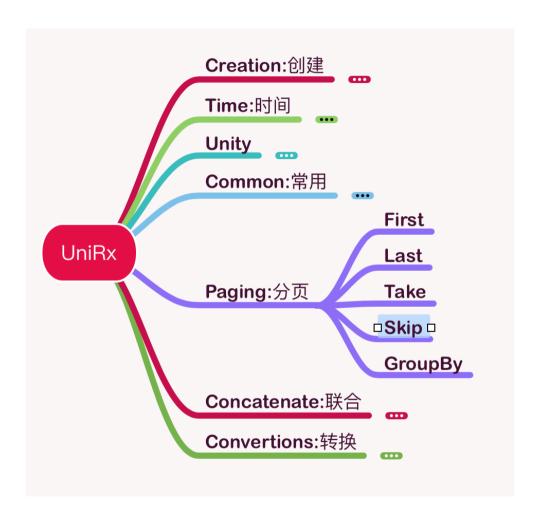

#### 输出结果为

# UniRx Skip 在知识地图中的位置

### UniRx Skip 代码示例

```
* http://sikiedu.com liangxie
using UniRx;
using UniRx.Triggers;
using UnityEngine;
namespace UniRxLesson
    public class UniRxSkipExample : MonoBehaviour
         private void Start()
             this.UpdateAsObservable()
                  .Where( => Input.GetMouseButtonDown(0))
```

```
.Skip(5)
.Subscribe(_ => { Debug.Log("mouse clicked"); });
}
}
```

输出结果为,鼠标点击第六次时,才开始输出"mouse clicked"。 今天的内容就这些。
