23.IgnoreElements

IgnoreElements 示意图

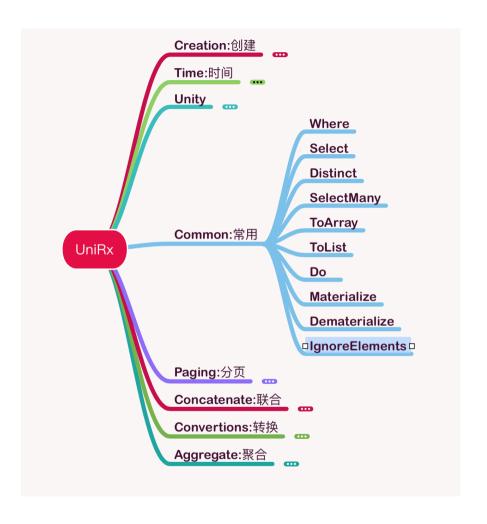

不发射任何数据,只发射Observable的终止通知

IgnoreElements操作符抑制原始Observable发射的所有数据,只允许它的终止通知(onError或onCompleted)通过。

如果你不关心一个Observable发射的数据,但是希望在它完成时或遇到错误终止时收到通知,你可以对Observable使用ignoreElements操作符,它会确保永远不会调用观察者的onNext()方法。

IgnoreElements 所在知识地图中的位置

IgnoreElements 代码结果

```
* http://sikiedu.com liangxie
using UniRx;
using UnityEngine;
namespace UniRxLesson
    public class IgnoreElementsExample : MonoBehaviour
         private void Start()
              var subject = new Subject<int>();
              //Could use subject.Where( =>false);
              var noElements = subject.IgnoreElements();
```

```
subject.Subscribe(
      i => Debug.LogFormat("subject.OnNext({0})", i),
      () => Debug.LogFormat("subject.OnCompleted()"));
noElements.Subscribe(
      i => Debug.LogFormat("noElements.OnNext({0})", i),
      () => Debug.LogFormat("noElements.OnCompleted()"));
subject.OnNext(1);
subject.OnNext(2);
subject.OnNext(3);
subject.OnCompleted();
```

输出结果为

```
subject.OnNext(1)
subject.OnNext(2)
subject.OnNext(3)
```

subject.OnCompleted()
noElements.OnCompleted()

今天的内容就这些
