22. Single / Default

LINQ Single 简介

返回序列中的单个特定元素,与 First 非常类似,但是 Single 要确保其满足条件的元素在序列中只有一个。

LINQ Single 代码示例

* http://sikiedu.com liangxie

```
using System.Linq;
using UnityEngine;
namespace UniRxLesson
      public class LINQSingleExample : MonoBehaviour
            private void Start()
                  string[] fruits = { "apple", "banana", "mango",
                        "orange", "passionfruit", "grape" };
                  var fruit1 = fruits.Single(fruit => fruit.Length > 10);
                  Debug.Log(fruit1);
```

}

输出结果为

passionfruit

UniRx Single 示意图

Single 操作符也与 First 类似,但是如果原始 Observable 在完成之前不是正好发射一次数据,它会抛出一个 NoSuchElementException。

UniRx Single 所在知识地图位置

UniRx Single 代码示例

```
* http://sikiedu.com liangxie
using UniRx;
using UnityEngine;
namespace UniRxLesson
    public class UniRxSingleExample : MonoBehaviour
         private void Start()
             string[] fruits = { "apple", "banana", "mango",
                  "orange", "passionfruit", "grape" };
```

输出结果为

passionfruit

今天的内容就这些
